Polet LED Green

Pioneering Sustainable LED Solutions

With over three decades of experience in LED technology, Polet LED Green is now focused on advancing sustainable solutions across three distinct series. Our commitment to energy efficiency, mobility, and resource optimization has driven us to develop cutting-edge battery-powered and solar-powered LED innovations. We are committed to shaping a greener future while ensuring reliability and performance in every product.

Polet BAT Battery-Powered Solutions

Designed for enhanced mobility and sustainability, the Polet BAT series integrates rechargeable battery technology, reducing energy consumption while maintaining high performance.

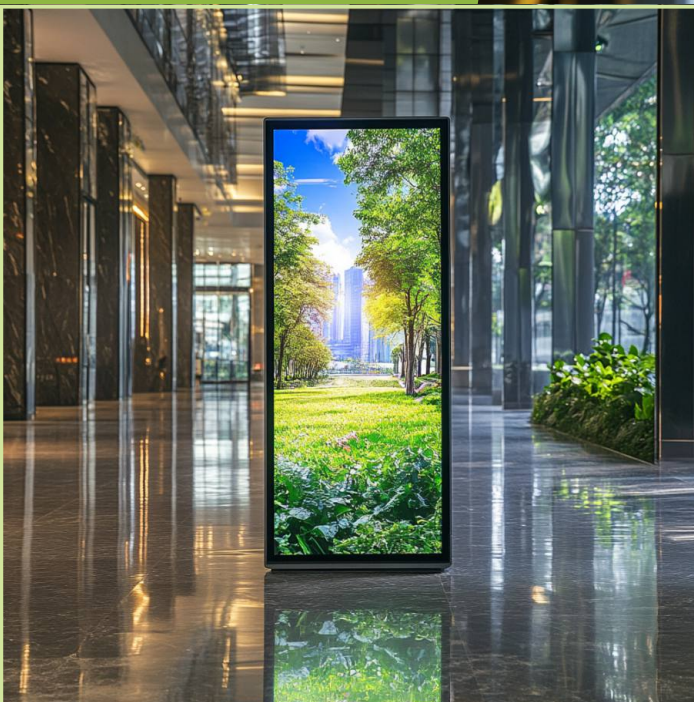

Polet LED.BAT

LED Battery-Operated Posters

Offering up to 8 hours of autonomy for outdoor displays and up to 18 hours for indoor applications. The lineup includes outdoor models with 2.5, 3, and 5 PH resolution and indoor models with 1.5, 1.8, and 2 PH resolution. These posters are designed for high visibility, making them an excellent choice for advertising, event signage, and public information displays. Their sleek, lightweight construction allows for easy placement and mobility.

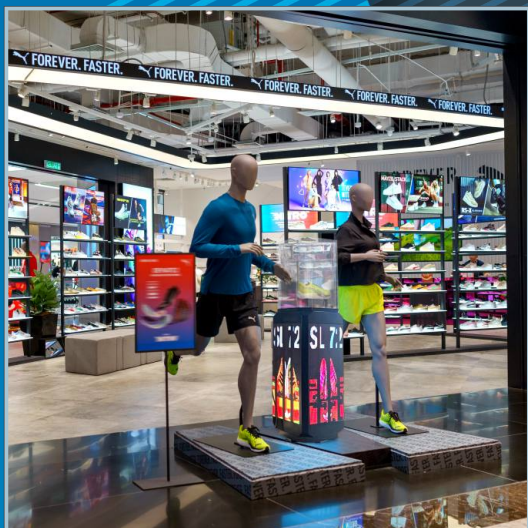

Advantages

- High Visibility
- Portability
- Energy Efficiency
- Customizable and Versatile
- Durability
- Cost-Effective in the Long Run
- Environmentally Friendly
- Attractive Design Features

Display Pedestals

Premium display pedestals powered by our advanced battery system, eliminating the need for external power sources. Specifically designed for luxury footwear, eyewear, and high-end electronics, these displays ensure maximum mobility and elegance. The minimalist yet striking design enhances product presentation, making it ideal for retail stores, exhibitions, and premium showrooms.

Advantages

- Illuminates the Displayed Item
- Operates Without External Wiring
- Enhances Presentation
- Portable and Flexible
- Supports Smart Features
- Uninterrupted Display

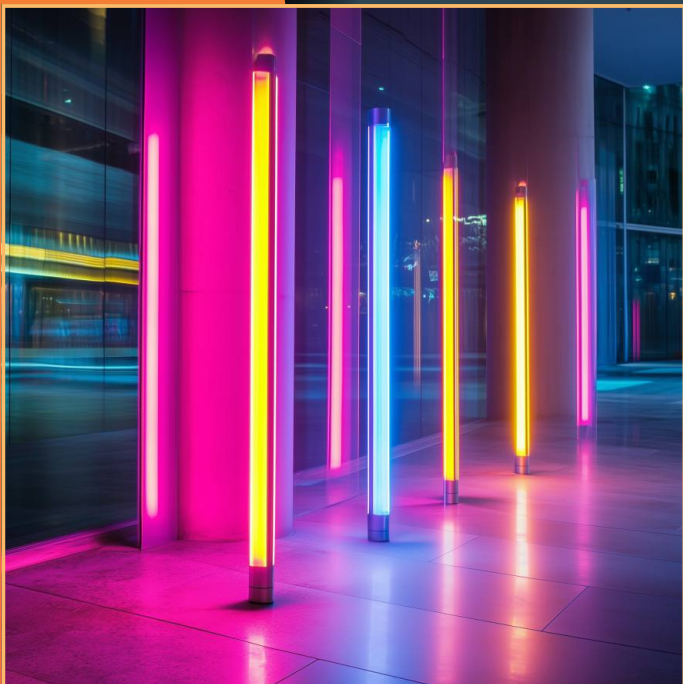

This type of pedestal is a versatile and sophisticated solution for showcasing items in any environment, blending functionality with aesthetics.

Polet LED.BAT.TUBE

Battery-Operated LED Tubes

Battery-operated LED tubes, perfect for illuminating any space with energy efficient lighting. These portable tubes offer uniform, high-quality lighting suitable for architectural applications, photography studios, and emergency lighting solutions. Their flexibility in placement ensures adaptability for both professional and casual use.

Advantages

- Portability
- Energy Efficiency
- Easy Installation
- Backup Lighting
- Low Maintenance
- Environmentally Friendly
- Compact and Lightweight
- Low Heat Emission
- Versatility
- Remote or Smart Features
- Durability

Polet LED.BAT.PAR

Portable battery-powered PAR

Portable battery-powered PAR lights, ideal for various lighting applications, delivering versatility and efficiency. Designed for concerts, stage performances, and dynamic lighting setups, these PAR lights provide exceptional brightness and color accuracy while being completely wireless for unrestricted placement.

Advantages

- Portability
- Flexibility
- Quick and easy content change
- Battery-Operated Convenience
- Energy Efficiency
- Customizable Lighting
- Durability
- Quick and Easy Setup
- Cost-Effective
- Environmentally Friendly
- Quiet Operation

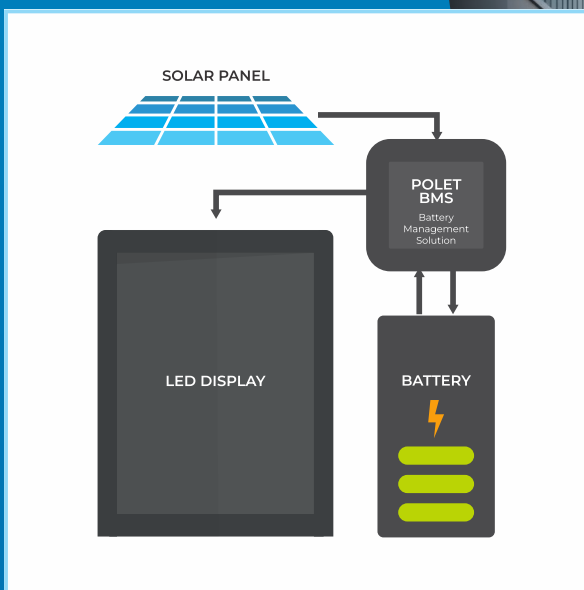

Custom Solar-Powered Outdoor Solutions

A key feature of our sustainability initiative, Polet SOL.BAT solutions are fully customizable outdoor LED systems designed to maximize solar efficiency. Each project is tailored to the investor's needs, considering location, power supply, screen dimensions, and solar efficiency, ensuring that solar capacity is at least 50% higher than the system's power demand. Additionally, integrated battery storage guarantees uninterrupted night-time operation.

Advantages

- Sustainability
- Cost Savings
- Easy Installation
- Reliability
- Customizability
- Durability
